EXTERNAL

SUNDARMAHALINGAM

SELF INTRODUCTORY

My name is Monisha Subban. I have completed Bachelor of Commerce with Professional Accounting in the year 2016. I have a professional experience of about 1.5 years of experience as a Technical Support Analyst with IBM (2016-2017) and about 1 year with BNP Paribas (2018) in Corporate Actions supporting Australia and New Zealand clients.

I have a professional gap of about 4 years (2019 - present) to take care of my family. In order to kick start my career I chose SAP which is highly expected in business nowadays. For my educational qualification SAP FICO (Finance & Controlling) was the best suite.

I now successfully completed the course and also the internship at Thiranz Tech Solutions under the guidance of Mr. Ziya-Ul-Haq.

My portfolio for the completion of the course as an intern is below.

All the details in this portfolio are my 4 months hard work and are true to my knowledge.

Sincerely,

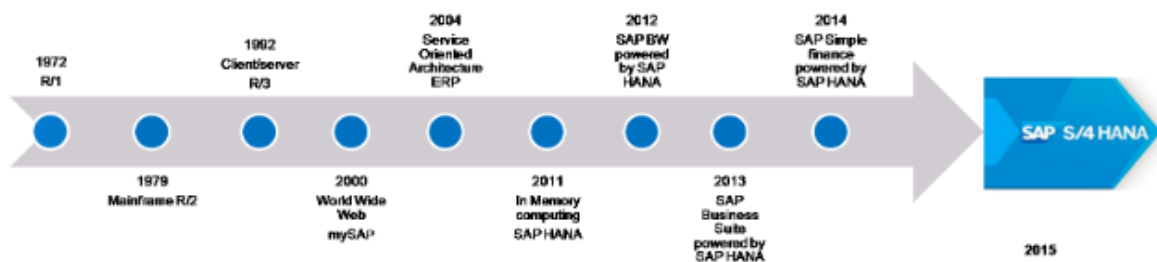

Monisha Subban.

SAP – System Application Product in Data Processing

SAP is software or a company itself. It is a German based Organization formed in the year 1972 by Ex-IBM employees. SAP is an ERP (Enterprise Resource Planning) Application Software.

History of SAP

- 1972-1980: IBM employees became SAP Founders and launched SAP Logo.
- They formed a LLC and have employees to work as well as customers/ clients.
- 1981-1990: SAP growth to other countries with increase in revenue and manpower.
- They entered Financial Markets and Industries.
- 1991-2000: SAP an agreement with Microsoft.
- Marketing activities in Russia, Japan and China.
- SAP entered Share Market and had a lot of investors.
- 2001-2010: SAP started running on latest web technology.
- Downfall in the year 2009 but rose back again and entered US markets.
- 2011-Present: SAP on mobile devices where Apple and SAP became partners.
- Launched new generation S/4 HANA.
- Now it's the world's largest business network.

SAP Modules – Functional Modules

- ❖ FICO – Finance and Controlling
- ❖ SD – Sales and Distribution
- ❖ MM – Material Management
- ❖ PP – Production Planning
- ❖ PM – Plant Maintenance
- ❖ QM – Quality Management
- ❖ SCM – Supply Chain Management
- ❖ HCM – Human Capital Management

Technical Module:

ABAP – Advanced Business Application Programming

Network Module:

BASIS – Business Application Software Integrated Solutions

Database Module:

S/4 HANA – High Performance Analytical Appliances

SAP is an ERP Central Component.

SAP Project Types:

Implementation Project: SAP is being implemented for the first time in an organization. For Implementation SAP follows ASAP methodology (Accelerated SAP)

- **Project Preparation:** Initial planning takes place as to what all can be implemented and how along with the timeline to complete the project and cost. These all are discussed in the very first meeting “kick-off meeting”.
- **Business Blueprint:** AS IS Project (Current Status Scenario) TO BE Project (Future Business Scenario) is pictured along with scope, planning and team building to

execute the project. GAP analysis takes place here (difference between existing system and SAP system)

- **Realisation:** Submission of all TO BE documents. Core Team Member to consultant. Quality Checking, Testing and Feedbacks.
- **Pre-Final Preparation:** Check with the client if they are satisfied with their implementation. Check user acceptance testing. In case the project is approved then we move to next stage or get back to discussion and blue print.
- **Go- Live and Support:** Project implemented and goes live. As per the SLM any issues can be rectified without any charges and later is converted as Incidents. Every incident has a ticketing charge.

Support Project: After implementation and go live the implementation team will provide support to the client as agreed in the SLA.

Up gradation Project: SAP system upgrades to the latest released version.

Roll-out Project: Means expanding the business in other regions after implementation.

SAP using companies:

- MRF
- Coco-Cola
- TATA
- Samsung
- TITAN
- Nestle
- Sony
- HUL – Hindustan Unilever Limited
- Dabur
- Hero
- Big Bazaar
- Asian Paints

SAP Competitors:

- Zoho
- Oracle
- Sage
- Infor
- SAS
- MS Dynamics

NILAN'S DAIRY FARM

Nilan's Dairy Farm is a company which purchases cow's milk from vendors and then manufactures all kinds of Dairy products and supplies it to many customers. The company is based in "Pannimadai" a small place in "Coimbatore, India". All settings for Nilan's Dairy Farm are structured in SAP and finally the Financial Statement is viewed.

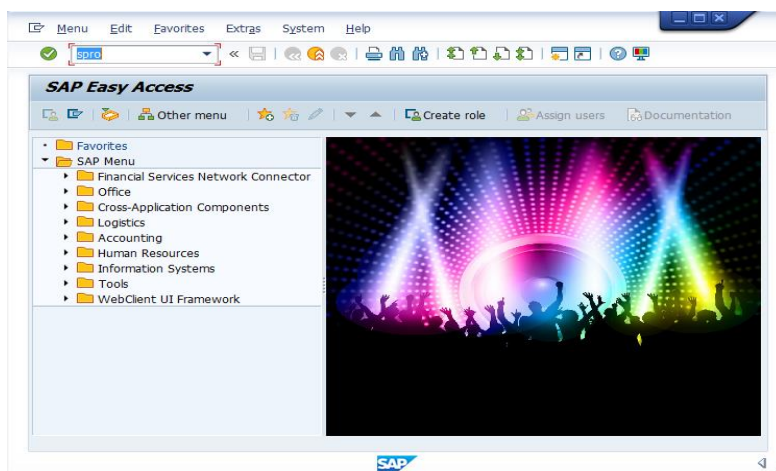

ENTERPRISE STRUCTURE

PARENT COMPANY (OX15)

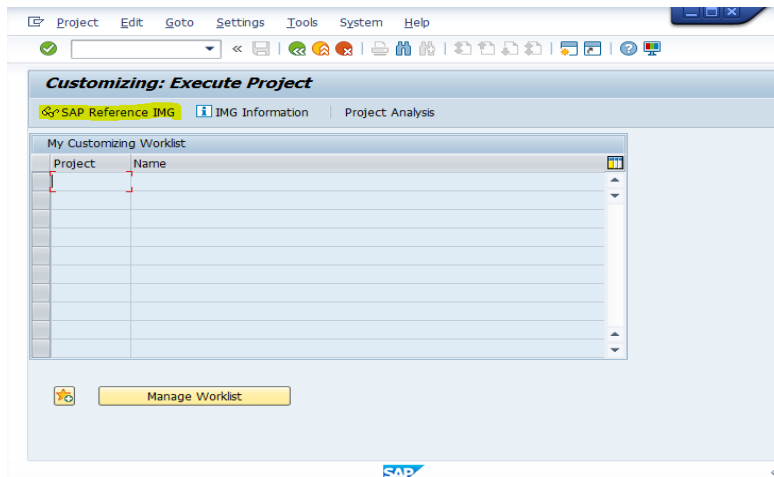

Define Company (OX15):

It represents a group or an organizational unit of a company. One organizational unit is linked with another organizational unit of a company. This relationship is called Enterprise Structure or Organisational structure.

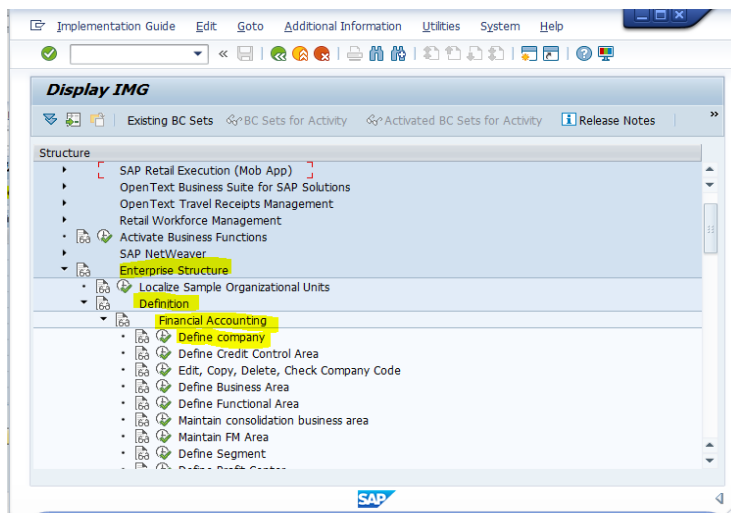

Type **SPRO** (SAP Project Reference Object) or **OX15** to define a company.

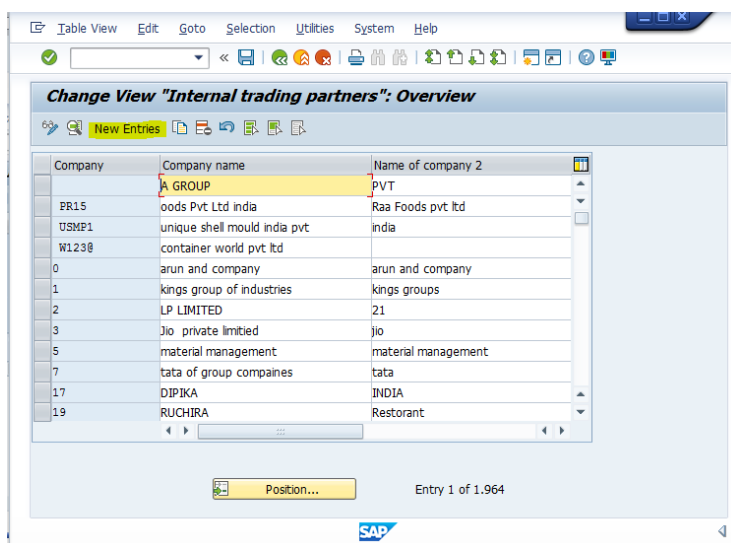

Click on SAP Reference IMG

Select Enterprise Structure > Definition > Financial Accounting > Define Company

Click on New Entries

A parent company is always 6 digits, alpha numeric. (eg. MONICO)

Fill in the details with exact **Country code**, **Language** and **Currency**.

Company	MONICO
Company name	Monisha's Dairy Group
Name of company 2	
Detailed information	
Street	Sidhapudur
PO Box	1596
Postal code	641044
City	Coimbatore
Country	IN
Language Key	EN
Currency	INR

When you click enter a TR will appear. Click on own request and click on the concerned query to get a unique TR to be generated. You can write any short description for your company. All new configuration or customization made for that particular company will be saved in a TR “Transport Request”.

Prompt for Customizing request	
View Maintenance: D...	V_I880

Short Description	Monisha's Configurations
☐ ☐ ☐ ☐ ☐ Own Requests ☐	

CREATION OF COMPANY CODE (OX02)

Every separate legal entity or a limited liability company or a private limited company is a company code. A company code is mandatory. In every country it is legally required to provide the financial statements to the government. Hence, a company code is created. A group can have “n” number of companies.

Eg: Reliance is a company – Reliance Trends, Smart, Footwear, etc is a company code.

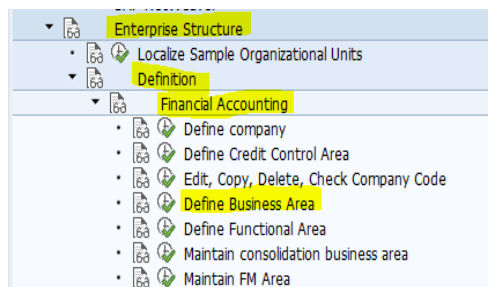

ASSIGN COMPANY CODE WITH COMPANY (OX16)

SEGMENT (S_AL0_19000003)

Segment is newly implemented in SAP. It is to know the performance as per business lines and geographical area in Balance Sheet. (i.e) to analyse profit and loss in that particular region. Segment has no T-Code and also it is not assigned with any Company Code. Segment is implemented as per IFRS (International Financial Reporting Standards).

Segment is mostly used in profit centre in CO.

A Segment has a programming code (s_al0_19000003).

Segments for Segment Reporting	
Segment	Description
NITNSE	Tamilnadu Segment of NILA

CREDIT CONTROL AREA (OB45)

This is defined to control the credit limit of a customer or an employee of the business. Credit Limit is known by monitoring or observing the previous credit history. CCA is an integration of SD and FI Modules. SD knows the risk level of the customer and is communicated with FI. CCA can have different credit limit for every company code or different company codes for every credit limit (vice-versa).

VARIANT

FISCAL YEAR VARIANT (OB29)

Fiscal Year Variant

Fiscal Year is similar to the Periodicity concept in Accounting Concepts. This is to know the financial position of the business. Fiscal Year is of two types:

- Year Dependent: A shortened fiscal year is defined as Year Dependent FY.
- Year Independent: A country following SAP fiscal year or calendar year.

Each month in the fiscal year is called as a Period. Every country has its own fiscal year and special periods. Fiscal year is of 12 months and the special period is a maximum of 4 months. Eg: SAP has designed a Fiscal Year Variant for many countries and that could be copied to company code according to country. For example Germany K0 – denotes no special period. K1 - denotes 1 special period. Likewise it has up to K4 – 4 special periods. Fiscal Year has 3 attributes which are:

- Periods
- Period Text
- Shortened Fiscal Year

Define Fiscal Year Variant (OB29)

Path: SPRO > IMG > Financial Accounting (New) > Global Settings > Ledgers > Fiscal Year & Posting Periods > Maintain Fiscal Year Variant

Fiscal year variants						
FV	Description	Year-depen...	Calendar yr	Number of postin...	No.of special per

☐ Year-dependent

☐ Calendar year

Periods

	Month	Day	Period	Year shift
1	31	10	-1	
2	28	11	-1	
3	31	12	-1	
4	30	1	0	
5	31	2	0	
6	30	3	0	
7	31	4	0	
8	31	5	0	
9	30	6	0	
10	31	7	0	
11	30	8	0	
12	31	9	0	

Periods: Denotes the number of months (for SAP to understand) as SAP knows only calendar year.

FYI (Fiscal Year Indicator): It is calculated on the basis of current year minus future year.

Period Text: The periods (months) are noted as text for SAP to understand.

Shortened Fiscal Year: A company which is operating for less than 1 year or more than 1 year. Eg: Leap year

ASSIGN FISCAL YEAR VARIANT WITH COMPANY CODE (OB37)

Path: SPRO > IMG > Enterprise Structure > Assignment > Financial Accounting > Assign Company Code to Fiscal Year Variant.

CoCd	Company Name	Fiscal Year Variant	Description
NILA	Nilan's Dairy Farm	*1	APRIL TO MARCH NILA

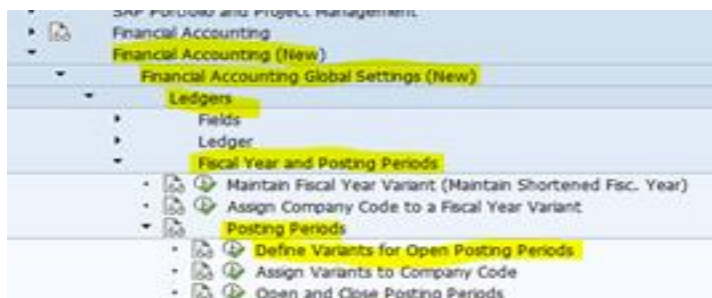

Fiscal year variant is pre-defined by SAP for every country. In India we follow v3. My fiscal year variant is *1.

POSTING PERIOD VARIANT (OBBO)

Define Posting Period Variant (OBBO)

To make transactions for the concerned period. Posting of entries for a specific period. This period is designed to have control

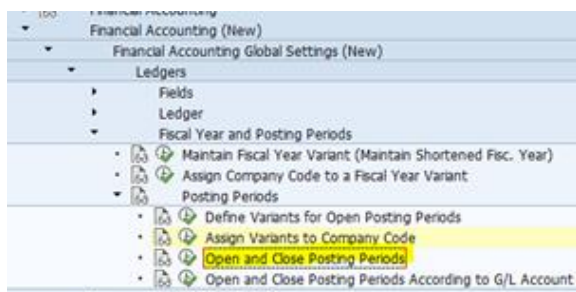

- Month wise (1- 12)
- A/c type wise (+ all types)
- Period wise (12m + 4 special m)

Variant	Name
NIPP	Posting Period Variant of NILA

OPEN & CLOSED POSTING PERIOD (OB52)

In case we need to make a transaction for the future period or previous period, we need to open a posting period for the transaction to be made in SAP. If it is closed it will not allow any entry to be made except for the current period.

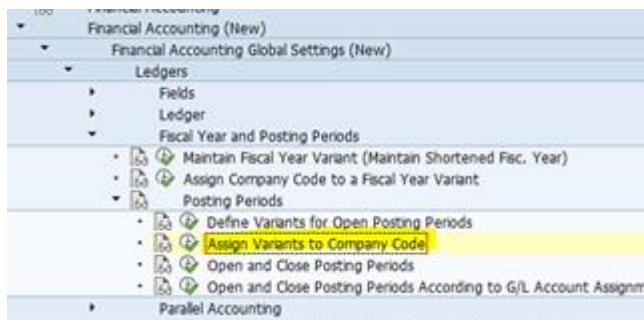

Var.	A	From acct	To account	From p...	Year	To per...	Year	From per.2	Year	To period	Year
NIPP	+			1	2022	12	2023	13	2023	16	2023

A	Short Descript.
+	Valid for all account types
A	Assets
D	Customers
K	Vendors
M	Materials
S	G/L accounts
V	Contract accounts

ASSIGN POSTING PERIOD WITH COMPANY CODE (OBPP)

CHART OF ACCOUNT (OB13)

It is a list of all General Ledger a/c that controls the name and number of GL Master Data and some control information. In other words, the grouping of GL a/c forms the framework for recording accounting transactions in a structured way. One COA can be used by one or many company codes. For every G/L a/c COA contains a/c no., a/c name, and some information on how an a/c functions and how a G/L is created in a company code.

Types of COA:

- Operational COA: It contains list of GL a/c for posting transactions.
- Group COA: It is used to consolidate many legal entities financial statement.
- Country COA: It is to meet country specific legal requirements.

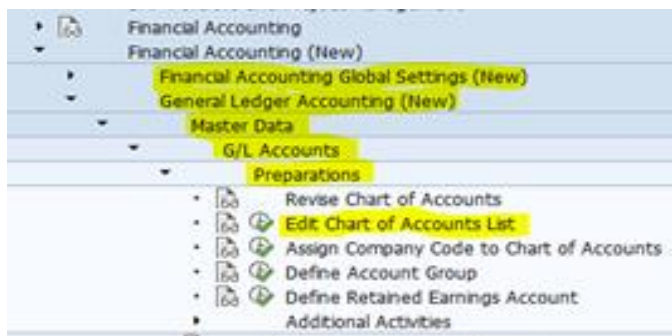

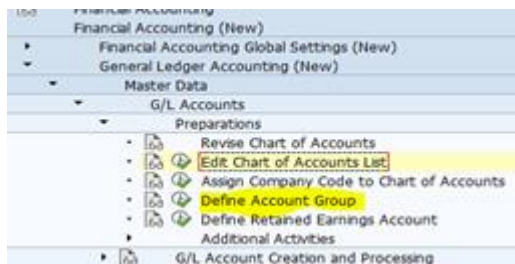

Chart of Accts	☒ NIOC

☐ Blocked	

DEFINE ACCOUNT GROUP (OBD4)

Account Group lists its

- Liabilities (1series)
- Assets (2 series)
- Revenue (3 series)
- Expenses (4 series)

Chrt/Accts	Acct Group	Name	From acct	To account
NIOC	LIAB	Liabilities	100	199
NIOC	ASST	Assets	200	299
NIOC	REVN	Revenue	300	399
NIOC	EXPN	Expenses	400	499

DEFINE RETAINED EARNINGS ACCOUNT (OB53)

To allow conditions or make settings in SAP for year-end assumptions. This is a place where revenue gets merged with Equity. During the year-end period this automatically posts in the financial statement.

Chart of Accounts	NIOC	Operational Chart of Account of NILA
Transaction	BIL	Balance carried forward
Account assignment		
P&L statm...	Account	
X	199	

Here x denotes nil. And 1999 has been taken because retained earnings account is processed in the year-end period in General Ledger and will affect the Capital/ Equity of the business in the financial report.

ASSIGN COA WITH COMPANY CODE (OB62)

Path: SPRO > IMG > Enterprise Structure > Assignment > Financial Accounting (New) > Financial Accounting Global Settings (New) > General Ledger Accounting (New) > Master Data > G/L accounts > Preparations > Assign Company Code to Chart of Accounts.

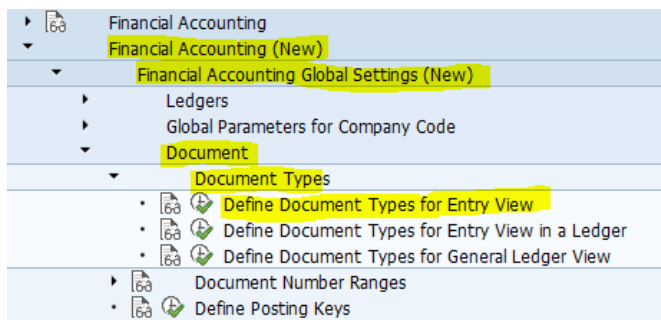

CoCd	Company Name	City	Chrt/Accts	Cty ch/act
NIIL	NIIL's Dairy Farm	Coimbatore	NIIL	

DOCUMENT TYPE (OBA7)

Document type is used to classify business transactions and to know how documents are stored. In SAP language posting a transaction is called document. For every document type there is a corresponding reversal document type.

SA – General a/c document

AB – Reversal entry document

Document Type		SA	GI accounts posting
Properties			
Number range	01	Number range information	
Reverse DocumentType	AB		
Authorization Group			
Account types allowed		Special usage	
☒ Assets ☒ Customer ☒ Vendor ☒ Material ☒ G/L account		☐ Btch input only	
Control data		Default values	
☐ Net document type ☐ Cust/vend check ☒ Negative Postings Permitted ☐ Inter-company postgs ☐ Enter trading partner		Ex.rate type for forgn cmcy docs	
Required during document entry		Joint venture	
☐ Reference number ☐ Document header text		Debit Rec.Indic ☐ Rec.Ind. Credit ☐	

NUMBER RANGE (FBN1)

N.	Year	From No.	To Number	NR Status
01	2022	0000000001	0000000999	0
02	2022	0000001000	0000001099	0

Here 1 to 999 denotes the level of entries that can be posted under SA in GL. NR status shows how many entries are posted (end user activity) and Ext means we need to give number for every document by ourselves, if we are not checking asking SAP to give INTERNAL number by itself.

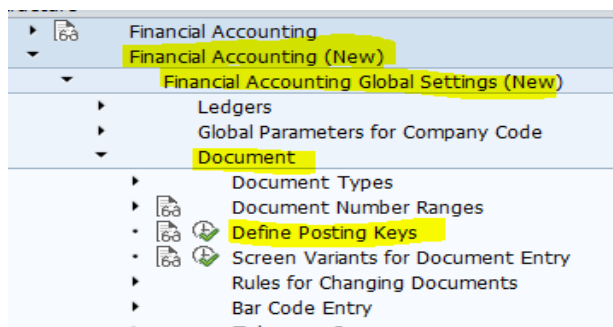

POSTING KEYS (OB41)

In order to determine the transaction type which is entered in the line item, a two digit numerical is used known as 'Posting Key'. Posting key determines

- a) Account Types
- b) Types of posting. Debit or Credit
- c) Field status of transaction

40 – Debit

50 – Credit

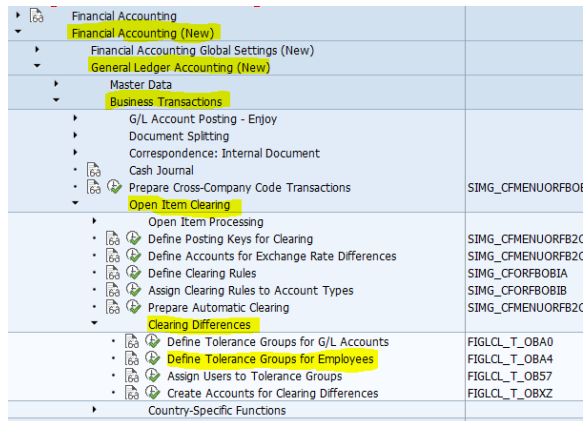

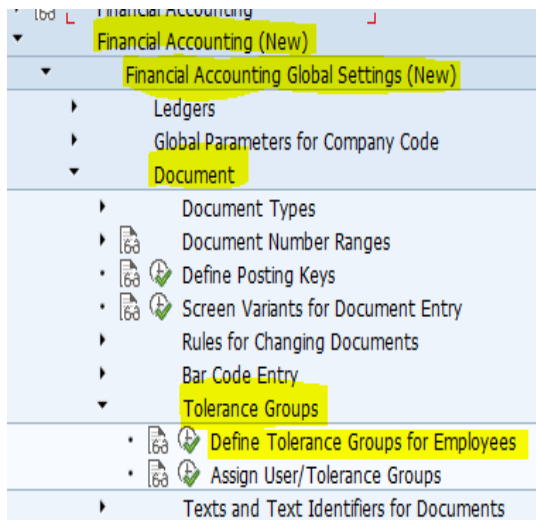

40	Debit entry	Debit	G/L account
50	Credit entry	Credit	G/L account

TOLERANCE

CREATION OF TOLERANCE EMPLOYEE LEVEL (OBA4)

Tolerance is used to predefine the amount limits for your employees on the basis of

- The maximum document amount the employee is allowed to post
- The maximum amount the employee can enter in a customer or vendor a/c
- The maximum cash discount percentage the employee can grant
- The maximum acceptance tolerance for payment differences for employee.

Group	NILA		
Company code	NILA	Nilan's Dairy Farm	Coimbatore
Currency	INR		

Upper limits for posting procedures			
Amount per document	999,999,999.000		
Amount per open item account item	999,999,999.000		
Cash discount per line item	10.000 %		

Permitted payment differences			
	Amount	Percent	Cash disct adj.to
Revenue	100.000	1.0 %	
Expense	100.000	1.0 %	

Group			
Company code	NILA	Nilan's Dairy Farm	Coimbatore
Currency	INR		

Upper limits for posting procedures			
Amount per document	999,999,999.000		
Amount per open item account item	999,999,999.000		
Cash discount per line item	10.000 %		

Permitted payment differences			
	Amount	Percent	Cash disct adj.to
Revenue	100.000	1.0 %	
Expense	100.000	1.0 %	

We have created 2 tolerance groups with and without a group name, in case of error in future they can be posted in the blank group.

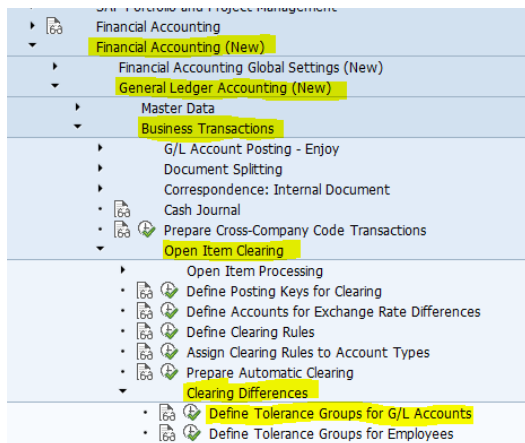

TOLERANCE FOR GROUPS G/L (OBA0)

Minor differences between the Invoice amount and the amount received from the customers/amount paid to the vendors are a very common occurrence. In such scenario, the following options can be adopted:

- The receipts/payments can be posted by partially clearing the invoices and creating a residual item for the difference, if the amount of difference is beyond a certain limit and is hence material
- The receipts/payments can be posted by clearing the invoices and creating a separate entry for the difference amount, if the amount of difference is within a certain limit and is hence immaterial

The above mentioned limit which controls whether a difference amount is material or immaterial is determined by the tolerance limit defined in the SAP system.

For eg: Buying a product worth Rs.999/- and paying Rs.1000/- the seller does not give a balance of Re.1/- this can be the sellers profit and vice versa.

Company Code	NILA	Nilan's Dairy Farm
Tolerance group		GL Tolerance Group of NILA

Tolerances for Groups of G/L Accounts in Local Curre			
Debit posting	10.000	INR	Percentage 1.0 %
Credit posting	10.000	INR	Percentage 1.0 %

CUSTOMER & VENDOR TOLERANCE LEVEL (OBA3)

These tolerances are used for dealing with differences in payment and residual items which can occur during payment settlement. Specify the tolerances under one or more tolerance groups. Allocate a tolerance group to each vendor via the master record. For each tolerance group, specify the following:

- Tolerances up to which differences in payment are posted automatically to expense or revenue accounts when clearing open items
- The handling of the terms of payment for residual items, if they are to be posted during clearing

CONTROLLING

One who can analyse a report and give an output in various forms is a controller. He is also called as a Business Analyst. The management consults the CO Team for important decision making in an organization.

CO helps to improve management across financial variances by planning and analysing costs to deliver reports that influence decision making. CO Team should be able to realize errors and correct them on time. A person with good analytical skills only can be a controller.

Any report that a CO generates should be informative and include detailed information on any actual/ plan variance. CO Team is the best at providing suggestions on management decisions. It analyses the data prepared by the Finance Team. It does:

- Planning
- Actual
- Variance / Actual Report

It supports coordination, monitoring, planning, budgeting, cost centre, profit centre etc.

The components of SAP CO

- Purpose
- Controlling Area
- Version
- Business Transactions
- Hierarchy Concept

Main Characteristics of Controlling involves:

- CEA: Cost Element Accounting
- CCA: Cost Centre Accounting
- PCA: Profit Centre Accounting
- PA: Profit Analysis
- PC: Product Costing
- ABA: Activity Bases Accounting

Purpose: CO element corresponds to a cost-relevant item in COA.

CO helps in Cost Center reports. There are two types of Cost Element.

Primary Cost Element: It takes the source from FI GL & its destination to CO.

Secondary Cost Element: It takes the source from CO & its destination to CO.

Controlling Area:

For SAP FI all the activities are done from company code perspective.

For SAP CO all the activities are done from controlling area perspective. Controlling Area is the Hero for CO.

Version: In SAP a plan is called as the version. Like the organisation follows a plan for the next 5 years is the version. SAP standard version is “0”.

Business Transaction:

1. **Option 1 (Assignment)** – same as company code
Following all configurations & customizations as same as company code. Only for one company code.
2. **Option 2 (Assignment)** – cross company code
Two different companies following the same CA.

Currency Concept:

LC1- Legal, Local & Company code currency.

LC2- Group Currency

LC3 – Global, Hard & Index Based currency.

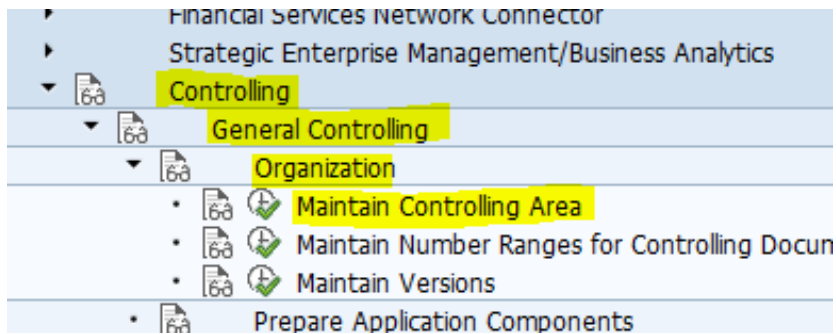

- ❖ 10 – Company code currency: the currency that is mentioned while creating a company code. It is used for cost accounting.
- ❖ 20 – Controlling Area currency: the currency that is mentioned while creating CA. It is also used for cost accounting.
- ❖ 30 – Group Currency: taking or using a common currency (i.e) applicable internationally.
- ❖ 40 – Hard Currency: the value of currency is more in those countries. Hard currency countries are economically & politically stable. Eg: US Dollar, British Pound, European Euro
- ❖ 50 – Index Based Currency: countries using other country’s currencies due to high inflation in those countries. (The value of currency is very less)
- ❖ 60 – Global Company Currency: assigning 2 or more currency for one company code.

Hierarchy Concept:

- ❖ Top Node
- ❖ Middle Node
- ❖ Lower Node

GENERAL LEDGER

Creation of General Ledger Master Data

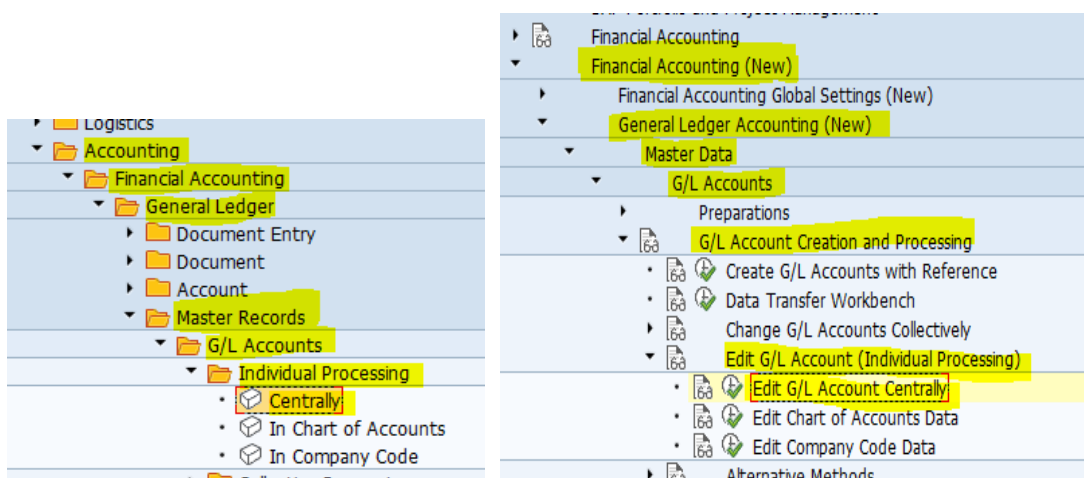

For each account a number has to be maintained in SAP. This is mainly because SAP does not understand terms (names). This is helpful when posting transactions.

In order to create master data we need Architecture, Master Data Field and Method

Architecture: Either COA method or CoCd method. (I am following COA method)

Field: States the GL a/c no., COA, A/c group, A/c type, Short text, Long text.

Method: Adopting Centrally Screen (FS00)

1. Type/ Description:

Specifies the Account Group (Liability, Asset, Revenue & Expense)

The screenshot shows the 'Type/Description' tab of the SAP FS00 screen. The 'Control in chart of accounts' section has 'Account Group' set to 'Assets' and 'Balance sheet account' selected. The 'Description' section has 'Short Text' as 'Cash in Hand a/c' and 'G/L Acct Long Text' as 'Cash in Hand account'. The 'Consolidation data in chart of accounts' section has 'Trading Partner' as an empty field.

2. Control Data:

States the currency (currency in terms of local currency/ parallel currency – 2 other currencies can be used for foreign transactions)
Reconciliation account for account type denotes the customer or supplier name.

Open Item Management states to whomever the business is repayable
 Line Item display shows the transaction type
 Sort Key specifies how to sort transaction (posting date wise)

The screenshot shows the 'Account control in company code' dialog box with the following fields and values:

- Account currency: INR Indian Rupee
- ☒ Only balances in local crcy
- Exchange rate difference key: [empty]
- Valuation group: [empty]
- Tax category: [empty]
- ☐ Posting without tax allowed
- Recon. account for acct type: [dropdown menu]
- Alternative account no.: [empty]
- ☐ Acct managed in ext. system
- Inflation key: [empty]
- Tolerance group: [empty]

Below the main section is the 'Account Management in Company Code' section:

- ☐ Open item management
- ☒ Line item display
- Sort key: 001 Posting date
- Authorization Group: [empty]

3. Create / Bank / Interest:

Most importantly specifies the Field Status Group
 Also gives us the option to tick post automatically
 If the account type is relevant to cash flow or not

The screenshot shows the 'Create/bank/interest' dialog box with the following fields and values:

- Field status group: G001 General (with text, allocation)
- ☐ Post automatically only
- ☐ Supplement auto. postings
- ☐ Recon. acct ready for input

Below the main section is the 'Bank/financial details in company code' section:

- Planning level: [empty]
- ☒ Relevant to cash flow
- Commitment Item: [empty]
- House Bank: [empty]
- Account ID: [empty]

Below the main section is the 'Interest calculation information in company code' section:

- Interest indicator: [empty]
- Interest calc. frequency: 0
- Key date of last int. calc.: [empty]
- Date of last interest run: [empty]

4. Key word / translation:

Specifies the language.

Translation		
Language Key	Short Text	Long Text
English	Cash in Hand a/c	Cash in Hand account

5. Information CA:

Shows the creation details from Chart of Accounts.

The screenshot shows the 'Information (C/A)' tab in SAP. It displays the following fields:

- Created on:** 18.11.2022
- Created by:** 84FICO12
- Change documents:** A button to view or change documents.

6. Information Cocc:

Information linked from company code.

The screenshot shows the 'Information (CoCd)' tab in SAP. It displays the following fields:

- Created on:** 18.11.2022
- Created by:** 84FICO12
- Change documents:** A button to view or change documents.
- Chart of Accounts:** MSOC Operational Cost of accounts of MONI
- Country Key:** IN India
- FM Area:** MSFA FM Area of MONI
- Controlling Area:** MONI Controlling Area of MONI

Below these fields, there is a section for 'G/L Account texts in company code' with a table:

X	L	Meaning	1st line	T	L	Cur	1	2
☐	EN	Account assignme...		☐	☐			
☐	EN	Accounting note		☐	☐			

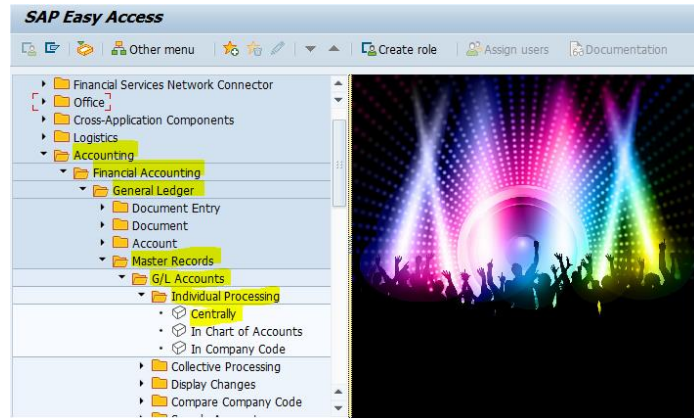

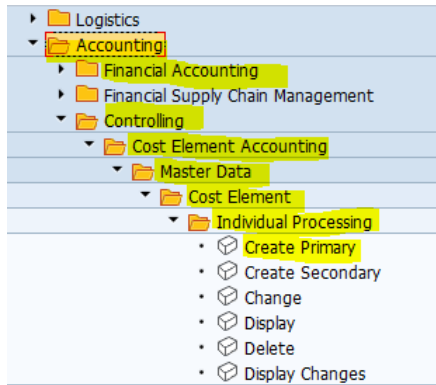

Create Cost Element (FS00) or (KA01)

This activity is one type which can be performed by both Controlling and FI end user screen.

This is mainly used by the controlling team to track the purchases/ other expenses made by FI or other departments.

Path (CO End user): SPRO > IMG > Accounting > Controlling > Cost Element Accounting > Master Data > Cost Element > Individual Processing > Create Primary

Path (FI End user): Accounting > Financial accounting > General Ledger > Master Records > General Ledger account > Individual Processing > Centrally

Cost Element	300	Sales a/c
Controlling Area	NILA	Nilan's Dairy Farm

HOLDING DOCUMENT

A document can be kept on hold without posting for hierarchy communication.
A temporary account number is given: NILAHD1

This is for the same level employee (he can keep the transaction on hold and can post it by himself). This does not have any financial impact unless posted.

PARK DOCUMENT

A document is kept on park when that particular employee does not have the authorization to post that particular document. This is mostly for the lower level employees dealing with higher possessions. This is actually an end user feature to authorise the document and post. This too does not have any financial impact. Park document process enables with Employee Level Tolerance. (a link between tolerance)

This concept in SAP term is called as “Work Flow Concept” (between 1 employee and another employee).

Setting Tolerance level for employee in order to Park a document.

Park can be done through FB50 (Document > Park)

Or

FV50 & F-65 is a screen especially for park documents.

ACCOUNTS PAYABLE

When a company purchases goods on credit which needs to be paid back in a short period of time, it is known as Accounts Payable. It is treated as a liability and comes under the head 'current liabilities'. Accounts Payable is a short-term debt payment which needs to be paid to avoid default.

The Accounts Payable department is responsible for the financial, administrative and clerical support of a company. They are in charge of making payments owed by the company to suppliers and other creditors, paying vendor invoices or bills, and recording the company's short-term debts.

Define Vendor Account Group (OBD3)

Within which details of Field Status Variant has to be given.

CREATION OF VENDOR GROUPS (OBD3)

The screenshot shows the SAP 'New Entries: Details of Added Entries' screen. The 'Account group' field is set to 'NIVG'. The 'General data' section is expanded, showing the 'Meaning' field with the value 'Vendor Group of NILA'. The 'One-time account' checkbox is unchecked. The 'Field status' section is also expanded, showing the 'General data', 'Company code data', and 'Purchasing data' fields.

Vendor Range Maintenance (XKN1)

It is predefined by SAP.

Term	Percentage	No. of days	/	Fixed date	Additional months
1.					
2.					
3.					

Explanations:
 Payable immediately Due net

Day limit specifies the “Due date” on which the payment is made or received.

Fixed day specifies the “Exact date” on which the payment is made or received.

Additional months here denotes on which month the payment is to be made. For instance the invoice is raised on 12th January and the ToP specifies the payment to be made on 7th of that month, then this particular payment will be overdue. So the company uses additional months so that the payment can fall on the preceding month also.

Block Key is mostly set up for vendor when the payment is released. We can block a vendor on different conditions so that the company does not make any kind of payment.

Block ind.▲	Description
	Free for payment
*	Skip account
A	Blocked for payment
B	Blocked for payment
F	Fraud Management
K	qwer inovuv block
N	IP postprocessing
P	Payment request
R	Invoice verification
V	Payment clearing

Default for baseline date specifies the date when the invoice has to be posted. Usually every company uses “Document date”.

ToP mapped in particular vendor/customer account.

Bank Charges (OBXK)

When a payment is to be made to the vendor immediately through NEFT Transfer then the particular bank might charge transaction charges depending on the amount transferred.

For a slab from 10000-100000 bank charges Rs.5/-

For a slab from 100000-200000 bank charges Rs.10/-

For a slab more than 200000 bank charges Rs.25/- and so on.

Certain conditions need to be made for bank charges to be applicable. The bank charges will affect Bank account and not vendor account.

Creation of Master Data in FS00.

412 NEFT Charges a/c

Mapping Bank Charges master data created along for the charges to affect Bank account and not vendor account.

INTEGRATION VENDOR & CUSTOMER

Integration happens when your vendor becomes your customer. Same vendor and same customer.

In vendor account mapping customer ID and on customer account mapping vendor ID.

This kind of activity is known as merging/ integration/ transfer/ connection / adjustment.

ACCOUNTS RECEIVABLE

Accounts receivable (AR) are the balance of money due to a firm for goods or services delivered or used but not yet paid for by customers. Accounts receivable are listed on the balance sheet as a current asset. Any amount of money owed by customers for purchases made on credit is AR.

Accounts receivable is the recording and processing of financial transactions relating to sales and customers. The opportunities span a number of valuable roles such as: Billing analyst: Liaise with the organisation's sales teams to carry out timely invoicing of customers.

CUSTOMER ACCOUNT GROUP CREATION (OBD2)

The screenshot shows the SAP form for creating a customer account group. The 'Account group' field is set to 'NICG'. The 'General data' section is expanded, showing the 'Meaning' field set to 'Customer Group of NILA'. The 'One-time account' checkbox is unchecked, and the 'Output determ.proc.' field is empty. The 'Field status' section is also expanded, showing 'General data', 'Company code data', and 'Sales data'.

Customer Range Maintenance (XDN1)

It is predefined by SAP.

K5	0000010601	0000010700	0	
----	------------	------------	---	--

Number range (OBAR)

Group	Name	Number range

BANKING

Banking deals with managing accounting transactions with your banks. Further, it helps you to manage both incoming and outgoing payments for effective cash-balance management.

HOUSE BANK

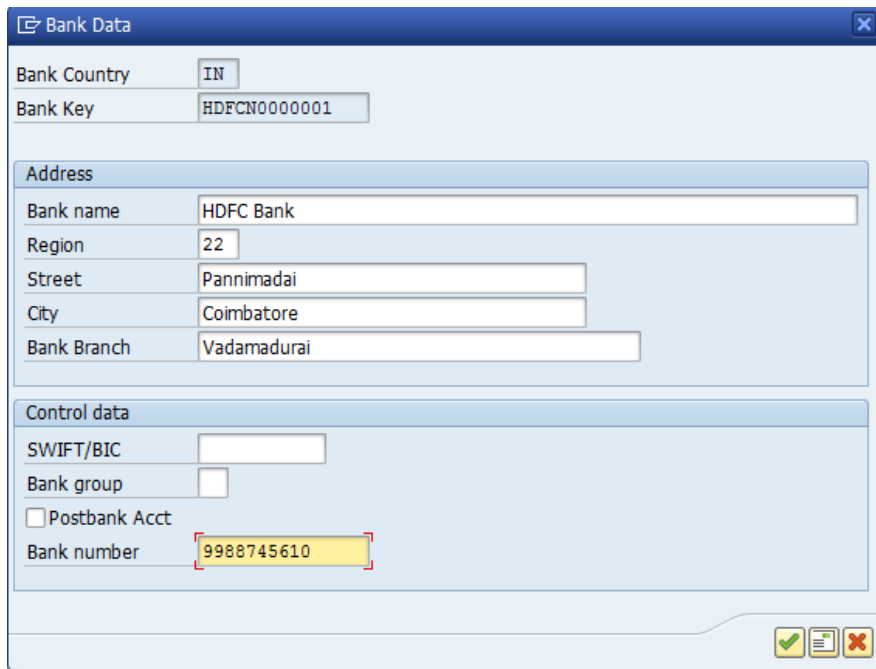

The house banks of your company are the banks that your company has an account with. You can use them to process payment transactions. In the SAP system, house banks have the following characteristics: Each company code can have multiple house banks. You can define multiple house banks for each bank.

DEFINE HOUSE BANK (FI12)

This is the companies' Bank account where the transaction takes place. A legal entity can have many House Banks.

Dialog Structure ▼ House Banks • Bank Accounts	Company Code	NILA	Nilan's Dairy Farm

 - Postbank Acct:** ☐
 - Bank number:** 9988745610

Buttons at the bottom right: [Checkmark], [List], [Close].

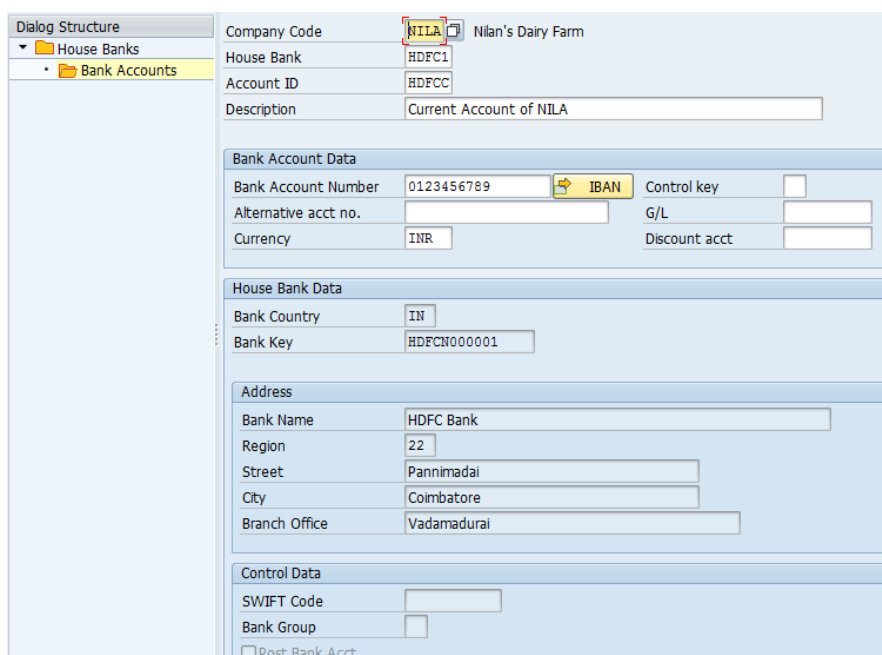

Bank Number here denotes the contact number of the bank.

Bank Key

First, it's important to note that the bank key is a unique, country-dependent identifier. It is an SAP internal ID used to uniquely identify a bank. This ID, together with the country key, links to the other bank data in the system, such as name, bank number, and SWIFT code.

Account ID

A bank account number is a unique set of digits assigned to the account holder when you open a bank account. Financial institutions will assign such numbers to each account you hold. Businesses and banks use these numbers to identify your account.

The 'Bank Account Data' dialog box contains the following fields:

- Dialog Structure:**
 - House Banks
 - Bank Accounts
- Company Code:** NILA (highlighted) - Nilan's Dairy Farm
- House Bank:** HDFC1
- Account ID:** HDFCC

PETTY CASH

A petty cash fund is a small amount of company cash, often kept on hand (e.g., in a locked drawer or box), to pay for minor or incidental expenses, such as office supplies or employee reimbursements.

It is to maintain cash in hand transactions. It can post all kind of transactions such as cash receipts, payments in one single screen. It allows you to make small petty expenses and receive small incomes in cash.

FOREIGN EXCHANGE

Foreign exchange is the trading of different national currencies or units of account. It is important because the exchange rate, the price of one currency in terms of another, helps to determine a nation's economic health and hence the well-being of all the people residing in it.

FOREX LOSS or GAIN

When a transaction is made using a foreign currency and a payment is made for the same on a future date, then the value of the currency might increase or decrease. If the value increases then it's a Loss for the business and if the value decreases it's a Gain for the business. This might not affect the open item but will be reflected as a Loss or Gain.

DUNNING

Dunning is the process of sending reminders to customers with overdue payment items, requesting payment of the outstanding amount by a specified date. To help you track open invoices and monitor the payment behaviour of your customers.

Dunning Types:

Dunning Levels – Up to 9 levels in SAP

Dunning Intervals – 1 week

Working Day – Public Calendar

Process Fee – Dunning Charges (Penalty)

Dunning Text – Format

Dunning Amount Determination – for how much customers need to pay

TAX DEDUCTED AT SOURCE

The concept of TDS was introduced with an aim to collect tax from the very source of income. As per this concept, a person (deductor) who is liable to make payment of specified nature to any other person (deductee) shall deduct tax at source and remit the same into the account of the Central Government.

Tax deducted at source is the amount that is to be deducted at the time of making payment to contractors or professionals. Withholding Tax is the amount deducted in advance that is before paying the amount to the payee. Withholding tax is deducted for paying the tax to the government.

Tax has to be deducted during Invoice or while making the payment.

For WHT the individual or a company requires PAN (Permanent Account Number) and TAN (Tax Assessment number) number.

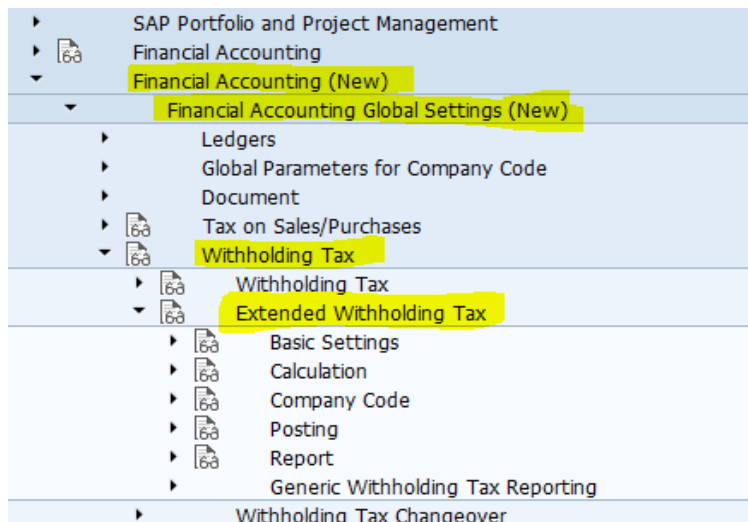

If the deductee does not have a PAN number then TDS is calculated for 20%

Steps for TDS (Configuration settings)

1. Check WHT countries.
2. Define TDS Tax Key.
3. Define TDS Exemption.
4. Define TDS Tax Types.
5. **Check TDS Tax Amounts.**
6. Check Recipients Types.
7. Define TDS Tax codes.
8. Creation of TDS Ledgers.
9. Create TDS Vendor.
10. Assign GL for auto posting process.
11. Define Business Place
12. Section Code.
13. Factory Calendar.
14. Maintain Tax Due dates.

15. Assign TDS to CoCd.
16. Activate TDS.
17. Maintain Logistics settings.
18. Vendor Update with PAN and TDS settings.
19. Posting TDS Transactions.
20. TDS Reports in SAP (J1INMIS)

Path: SPRO > IMG > Financial Accounting (New) > Financial Accounting Global Settings (New) > Withholding Tax > Extended Withholding Tax > Basic Settings.....

GOODS AND SERVICE TAX

GST is a single tax on the supply of goods and services, right from the manufacturer to the consumer. Credits of input taxes paid at each stage will be available in the subsequent stage of value addition, which makes GST essentially a tax only on value addition at each stage.

The types of GST in India are **CGST, SGST, and IGST**. This simple division helps distinguish between inter-state and intra-state supplies and mitigates indirect taxes.

ASSET ACCOUNTING

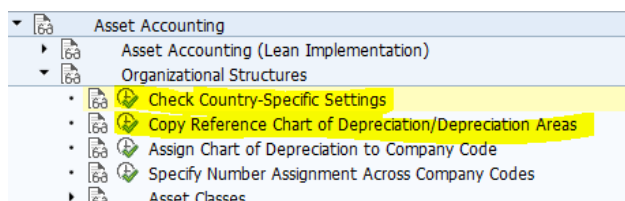

ASSET of DIARY FARM

In accounting, an asset is any resource that a business owns or controls. It's anything that could be sold for money. The study of a balance sheet and assets and liabilities helps us to ascertain the equity value. Asset Accounting in the SAP system is used for managing and monitoring fixed assets. In Financial Accounting, it serves as a subsidiary ledger to the general ledger, providing detailed information on transactions involving fixed assets.

Purchase of Asset and calculating depreciation for every year using a depreciation method.
